### 3. Public Nonfinancial Corporations (PNFCs) covering

Government-owned Corporations set up by specific laws, business units or companies owned by central government, or with central government holding shares by above 50 per cent.

### 4. Other Nonfinancial Corporations (ONFCs) covering

Companies, Private Entities, Private Educational Institutions and Hospitals, Organizations with legal-entity status or special establishment laws (e.g., joint ventures, Buildings of shared ownership, International Organizations headquartered in Thailand), Business Entities with central government holding shares of less than 50 percent, Closed Financial Corporations still with legal-entity status, Non-saving Cooperatives (e.g. consumer or fishery cooperatives), and Private Funds owned by ONFCs.

ONFCs also include branches of foreign companies in Thailand.

### 5. Households

### 6. Nonprofit Institutions Serving Household Sector (NPISH)

### 7. Nonresidents

### Other frequently used notions:

## Metadata

**Money issuers** comprise DCs (central bank and ODCs)

**Money holders** comprise

OFCs, local government, PNFCs, ONFCs, households and NPISHs. In other words, money holders include domestic sectors except central government and money issuers (DCs).

The term money holders and money issuers never apply to central government and nonresidents.

### **Monetary Authority**

This term refers to the bodies that together function as the issuer of Thai currency. Monetary authority thus includes the central bank who issues banknotes and conducts monetary policy, and the Treasury Department, under Ministry of Finance, who issues coins. Coins in circulation are incorporated in the liabilities of the central bank, as well as in the assets as a balancing contra-entry.

### **Domestic sectors:**

If referred to the counterparties of the Bank of Thailand, these sectors include all the above sectors except central bank and nonresidents.

### **Other domestic (or resident) sectors:**

If referred to the counterparties of DCs, these sectors include all the above sectors except DCs and nonresidents. In the context where the central government sector has already been counted, the term "Other domestic (or resident) sectors" then excludes the central government as well.

Where the DCs, central government, and nonresidents have been identified, "Other sectors" is sometimes used to refer to other domestic sectors or the money holders.

### **Private sectors:**

In monetary statistics, private sector usually includes OFCs, ONFCs, household and NPISH sectors.

In another context unrelated to monetary statistics, private sector may refer to the counterpart of the public sector. In that case, the private sector may include the financial corporations (ODCs and OFCs) in addition to the ONFCs, household and NPISH sectors.

### **Structure of Monetary Authority Survey**

- 1. Net Foreign Assets** comprise central bank's financial claims on nonresidents less financial liabilities to nonresidents. Claims and liabilities cover monetary gold and SDRs deposits, securities, and loans.
- 2. Claims on Other Depository Corporations** comprise central bank's all financial claims on ODCs.
- 3. Net Claims on Central Government** comprise central bank's financial claims on central government less financial liabilities to central government e.g. currency held by central Government. deposits, and BOT bonds held by Social Security Fund.
- 4. Contra-entry: coins in circulation.** This is a balancing item to adjust for the inclusion of coins in circulation in monetary base on the liabilities side.
- 5. Claims on Other Sectors** comprise central bank's financial claims on money holders.
- 6. Monetary Base: a group of liabilities comprising**
  - Currency in circulation (banknotes issued by BOT exclusive of cash in hand of BOT, and coins issued by the Treasury Department) less
