Table code	EC_XT_009
Title	Total Value and Quantity of Exports (US\$)
Frequency ,Lag time and Release schedule	Frequency Monthly Lag time 1 month Release schedule The last business day of the following month
Summary Methodology <ul style="list-style-type: none"> • Analytical Framework, Concepts, Definitions, and Classifications • Scope of the data • Accounting Conventions • Nature of the Basic Data Sources • Compilation Practices 	<p>Foreign trade statistics refer to transactions involving movements of goods out of or into the Kingdom of Thailand over a specific time period. The figures cover all categories of goods that enter or leave the Kingdom of Thailand and pass through customs formalities at any of the Customs Houses and representative offices, either via land, sea or air transport. The data also include postal packages but do not include smuggled goods and products procured on carriers at sea.</p> <p>Bank of Thailand (BOT) obtains electronic copy of the data and tabulates them into exports classified by the BOT's Economic Classification (EC). Value of exports in Baht equivalent obtained from the Customs data is then converted to US dollar equivalent using exchange rates as announced by the Customs (buying rate for exports and selling rate for imports). Quantity of exports is shown only for those commodity groups with unique unit of quantity (e.g. metric ton). This is limited to agricultural, fishery, mining and some manufactured products.</p>
Source of data	Customs Department, Ministry of Finance
Accessibility	BOT's website (http://www2.bot.or.th/statistics/ReportPage.aspx?reportID=59&language=eng)
Revision policy	Monthly figures of the first half of the year are revised at the end of December. Monthly figures of the entire year are revised again at the end of June of the following year.
