A direct investor may invest in equity capital, lending to affiliates, or reinvested earnings. Investment in equity is treated as a direct investment when the direct investors own 10 percent or more of the voting shares for an enterprise or the equivalent for an unincorporated enterprise. Reinvested earnings is defined as investment earnings neither distributed as dividend nor remitted to direct investors.</p> <p>The table displays TDI data of <u>ALL</u> sectors, classified by investing business. Data are mainly obtained through International Transaction Reporting System (ITRS), then adjusted to reconcile with annual international investment position (IIP) survey. Conversion to US dollar equivalent is based on monthly New York closing average exchange rate.</p>
